## Profile

Over 7+ years of extensive experience in web-based applications. Worked mainly with application software analysis, design, development, and testing of web (all the phases of SDLC and quality assurance/testing). Skilled in **NodeJS, ExpressJS, TypeScript, Micro-Services, Angular, RXJS, ReactJS, REDUX** and **RESTAPI**. To seek a challenging position in a company to a motivating and vibrant work environment. **Currently located in berlin Germany.**

## Employment History

### Fullstack Developer, Gamigo Group AG, Berlin, Berlin

FEBRUARY 2023 – PRESENT

- development and deployment of multiple web applications using Angular 15, RxJS, Material Design, and NgRx.
- Collaborated with the team to design and implement new user interfaces, improving the user experience by 25%.
- write unit test cases in chai and mocha.

### Backend Developer, DevDigital, Vadodara, India

MARCH 2021 – PRESENT

- Expertise in modern web architecture using various advanced **JavaScript** frameworks and libraries like **NodeJS, ReactJS/Redux**, bootstrap, material UI, **ES7, ES6, ES5**, and **Typescript** features for handling asynchronous data requests.
- Expertise in MERN (MongoDB, ExpressJS, ReactJS, and NodeJS) stack applications.
- Worked on AWS large project using **AWS Cognito, Lambda, API gateway**, node back-end, MySQL, store procedure React/Redux front-end.
- Worked on **AWS RDS** database and **EC2** instance integration
- Worked on complex 3-tier architecture and complex system form.
- Expertise using **React Component, Reducers**, and Actions to implement MVC and **Redux** architecture and having experience with Middleware.
- Working as a Technical Lead involves client handling, and joining the scrum calls and client meetings.
- NodeJS Deploy on **AWS CDK** by using the **Docker container**
- Integrated **Stripe** and **RazorPay** payment gateway
- **Webhook** and **RESTAPI** integration.

### Backend Developer, Corigami Technologies pvt Ltd, Vadodara

JANUARY 2019 – MARCH 2021

- **RESTful API** design and development using **NodeJS, ExpressJS**, and **microservices**.
- Extensively used **Promises, async, await** and **event emitter** in **NodeJS** to avoid callbacks and more readable code.
- Build great online seamless user experience using modern frameworks and libraries.
- Good understanding of **Document Object Model (DOM)**, **DOM Funtion**, **ReactJS Componant**, **Redux**
- manage different API responses in a single one by using **micro-services**.

- Responsible for writing server-side web application logic, developing back-end components, connecting the application with the other (often third-party) web services, and supporting the front-end developers by integrating their work with the application.
- Sound Understanding and good experience with **Object Oriented Concepts, Object Oriented JavaScript, Object Oriented Design and Implementation**
- Architected and lead the transition from monolith to a cloud-based **microservice** architecture on AWS

### **Backend Developer , [www.purchasekaro.com](http://www.purchasekaro.com), Vadodara**

JULY 2017 – DECEMBER 2018

- worked on making **micro-services** and third party **API integration** like hotel booking api, bus booking api, flight booking api, payment gateway api, domestic money transfer api.
- experience with **SQL** schema design, **SOLID principles**, **REST API** design .
- Strong grip on api creation and api integration.
- Expertise in developing and updating web pages quickly using **JavaScript/Typescript, React, Redux, HTML/CSS**
- worked on B2B, B2C portals
- wrote non blocking code using numerous advanced techniques and strategies such as a multi threading & JavaScript dependency management.

### **Web Developer, Myrestica Technologies PVT LTD , Vadodara**

JULY 2015 – JUNE 2017

- Developing and making code more modular by using the Model View Control (**MVC**)
- Database designing for regular and **e-commerce** portals
- Strong grip on object-oriented programming
- Provide development support to the government client and enable design, development, and implementation of complex Disability System
- Excellent communication skills with ability to articulate concepts and ideas through verbal, written and illustrative means
- Strong initiative and motivated to take ownership
- Meticulous attention to detail
- Intermediate to advanced knowledge of web technologies and browsers
- Excellent understanding of CSS, HTML & Javascript

## **Education**

### **Bachelor's in Information Technology , University of Gujrat, Vadodara**

JULY 2010 – JUNE 2014

#### **Backend Technology**

- NodeJS, ReactJs, ExpressJS, AWS Services.

#### **Frontend Technology**

- Javascript, ES6, ES7
- ReactJs, VueJS.

#### **Database:**

- MYSQL, SQL. PostgreSQL

- Mongo DB, PouchDB, CouchDB.

### **Other Tool**

- AWS services (Lambda, S3 bucket, Cloud Watch, Users, CDK, SDK, SAM CLI, Cloud Formation, Cloud Front, RDS, API gateway, Secret Manager, EC2 instance, Cognito User).
- Git, Jira, bitbucket. Worked on AWS project created API using AWS lambda and API gateway
- Postman, Docker, and ITPoker for time estimation

### **About Me**

I am a very quick learner person. I keenly believe in updating my skills constantly. I am a nature-loving person and I love visiting beautiful places. I enjoy listening to soft music and reading in my free time.
